DevOps Engineer

| LinkedIn | Ho Chi Minh, Viet Nam|

INTRODUCTION

DevOps and Cloud Engineer with roughly 2 years of experience designing, automating, and operating cloud-native infrastructure across Microsoft Azure and AWS environments. Experienced in managing Kubernetes platforms, building CI/CD pipelines, and implementing Infrastructure as Code using Terraform and Ansible.

Skilled in automation using PowerShell, Python, and Bash, with hands-on experience deploying containerized workloads using Kubernetes, Helm, and GitOps practices. Proven ability to improve platform reliability, security, and operational efficiency through automation, monitoring, and infrastructure optimization.

Additionally experienced in building and operating AI-powered systems, including AI agent orchestration platforms and intelligent document processing solutions such as invoice OCR systems, integrating modern AI capabilities into scalable cloud infrastructure.

MILESTONES & EDUCATION

2020-2024 **Bachelor of Computer Science - University of Science, HCM National University**

Modules: Database, Network Protocol, Computer Hardware, Software Testing, Software analysis.

GPA: 8.51/10.00. Semifinalist in the "Thach Thuc" Academic Competition 2022.

WORK EXPERIENCE

Now **DevOps Engineer & AI Engineer- HRS Group**

AI Agent Platform Development: Develop **AI agent fleet systems** that coordinate multiple AI agents to perform complex automated workflows. Implement orchestration logic enabling agents to collaborate and execute tasks across different services and tools.

Intelligent Document Processing: Develop and deploy **invoice OCR systems** for automated data extraction from financial documents. Integrate OCR outputs with backend systems to support structured data processing and downstream automation.

Cloud-based AI Infrastructure: Deploy and operate AI workloads across AWS and Azure environments, ensuring scalability and reliability. Integrate AI services into production systems using containerized workloads and cloud infrastructure.

Nov. 2024 **DevOps Engineer - HRS Group**

Cloud Infrastructure: Manage infrastructure across three Azure tenants, ensuring reliable and secure environments for development and production workloads. Design and maintain networking components including Application Gateway, Load Balancer, and Site-to-Site VPN connectivity.

Kubernetes Platform Operations: Operate and maintain AKS clusters running production microservices. Implement deployment workflows using Helm charts and ArgoCD (GitOps) to ensure consistent releases across environments.

CI/CD and Automation: Design and maintain Azure DevOps pipelines to automate build, deployment, and infrastructure workflows. Develop automation scripts using PowerShell, Python, and Bash to reduce manual operational tasks.
Infrastructure as Code: Provision and manage infrastructure using Terraform and Ansible, enabling reproducible infrastructure deployments.
Monitoring and Observability: Maintain monitoring systems using Prometheus, Grafana, and ELK stack to improve system visibility and troubleshooting capabilities**.**
Resilience and Continuity: Participate in Disaster Recovery and Business Continuity Planning (BCP) initiatives to strengthen platform resilience.

Feb. 2024 **DevOps Intern - HRS Group**

PROJECTS & OPEN SOURCE CONTRIBUTIONS

- k8s-investigate: A Python-based tool to discover and clean up unused Kubernetes resources in k8s cluster.
- radar: (Contribution) Visualize your k8s cluster, all from a single binary with zero cluster-side installation.

CERTIFICATION

2025
- Microsoft Certified: Devops Engineer Expert (AZ-400)
- Microsoft Certified: Solution Architect Expert (AZ-305)
- HashiCorp Certified: Terraform Associate
- Microsoft Certified: Azure AI Engineer Associate (AI-102)
- Microsoft Certified: Azure Security Engineer Associate (AZ-500)

2024
- Microsoft Certified: Azure Administrator Associate (AZ-104)

2019
- Academic IELTS certification 6.5 – British Council
